Index

Spring–Fall

1973

Adrian, Edgar D., 326
Alatortseva, A. I., 327
Alekseeva, D. G., 327
Andreev, B. V., 323–324
Andreeva, Lidia Petrovna, 330
Andry, N., 48
Anokhin, P. K., 320, 329
Aristotle, 194, 195, 196, 258, 326
Aserinsky, E., 324
Asratyan, E. A., 320, 322, 329
Atmungsferment, see under Warburg, Otto

Babkin, B. P., 319
Babskii, Evgenii B., *Fiziologiya cheloveka* (Human Physiology), 317, 318–322
Bacon, Francis, 3, 320
Baconian versus Popperian scientific method, 23–29
Bagg, H. J., *The American Naturalist*, 324
Barlow, N., 26
Bataillon, 221
Batelli, Federico, 175
Bates, Henry Walter, 84
Bateson, William, 128, 130, 132, 150, 292; role of, in development of genetics, 1–3; *Materials for the Study of Variation*, 2, 8, 9, 13–14, 18–19, 27, 289, 294, 296–297; poultry experiments of, 3–7; on discontinuous variation, 7–9, 13, 18–19, 142; his dispute with biometricians, 9–22 *passim*, 146–147, 148–149; Fisher's criticisms of, 11–19; and Galton, 20–22; Baconian method of, 23–29 *passim*; –Punnett poultry notebooks, 29–34; on Weldon, 127; and Mendel, 138, 145; on evolution, 283; arguments of, refuted by Weldon, 294, 315; his objections to Darwin's views, 294–297
Bateson, Mrs. William, 33
Baumgarten, Elena, 332
Baumgarten-Tramer, Franziska, 332
Baur, E., 151, 154
Bekhterev, V. M., 319
Beneden, van, 102
Bennett, J. H., 14
Beritashvili, I. S., 320
Biometrician-Mendelian controversy, 9–22, 146–149
Biryukov, D. A., *I. P. Pavlov: Life and Work* and ed., *A Chronicle of Pavlov's Life and Work*, 327
Blyth, Edward, letters to Charles Darwin from, 69–95 *passim*
Bonaparte, Charles Lucien (prince of Canino), 80, 83
Bonnet, Charles: contributions of, to spermatozoan biology, 41, 54-55, 61, 66–67, 197; correspondence with Spallanzani, 201, 202, 213–214, 221; his theory of generation as related to the nature of species, 259–263, 267, 276–279; his theory of generation compared with Buffon's, 265, 275–276, 279–280
Botkin, S. P., 319
Boveri, Theodor, 116–117, 177
Bridges, C. B., 2
Brooks, W. K., 20, 22, 114, 146
Brougham, Lord, 254–255

Buch, Leopold von, 84
Buchner, Eduard, 173–174, 176, 186, 187–188, 192
Buffon, G. L. de, 194, 222–223, 281; contributions of, to spermatozoan biology, 39–41, 48–55, 56–62 *passim*, 63–67; his theory of the organic molecule, 197–202, 205, 206, 208–209, 210, 218; his theory of generation as related to the nature of species, 259–260, 263–265, 266, 267–275; his theory of generation compared with Bonnet's, 265, 275–276, 279–280
Bykov, K. M., 319

Canino, prince of, *see* Bonaparte, Charles Lucien
Cannon, Cornelia, 332
Cannon, Walter B., 330, 332
Carter, G. S., 289
Castle, William E., 145, 151, 152
Chagovets, V. Yu., 319
Chambers, Robert, 226
Charles X (King of France), 240
Chauvin, Marie de, 101
Chernigovskii, V. N., 319
Chetverikov, 148, 153
Chronicle of Pavlov's Life and Work, A (ed. D. A. Biryukov), 327–330
Chystyakov, 102
Cobb, J. A., 303, 304
Cock, A. G., 31
Cole, F. J., 259, 264
Coleman, W., 3, 28
Combe, George, 254
Correns, Karl E., 1, 7, 145
Correspondence (Pavlov's), 330–333
Crow, 153
Cuvier, Georges, 164, 230, 246, 247

Danilevsky, N. Ya., 104
Darlington, C. D., 127, 216, 244
Darwin, Charles, 9, 12, 125; *On the Origin of Species*, 11, 14, 70, 159, 225–226, 320; William Bateson and, 13–18 *passim*; scientific method of, 25–27; letters from Edward Blyth to, 69–95 *passim*; on Shmankevitch's experiments, 100–101, 102; Timiryazev on, 103–104; Metchnikov on, 104, 106–107; Leshaft on, 109, 112; Kholodkovsky on pangnesis theory of, 113–114; Menzbier on heredity theory of, 116; support of naturalists for, 127; and sources of confusion in genetics, 128–130; on Gaertner's work, 135; hypothetico-deductive approach of, 139, 156; his theory of pangenesis, 141, 142, 260; Vorzimmer's study of his relationships to his critics, 155–165; predecessors of, 225–226; and Patrick Matthew, 227–228, 231–232, 244–258 *passim*; his theory of evolution by natural selection, 283–289; Bateson on theory of, 294–297; Weldon on theory of, 298, 308, 316
Darwin, Erasmus, 226, 227, 246
Darwin, Francis, 27, 298
Darwinism: and Lamarckism, Russian controversy over, 117–118; logic of, 283–290; Bateson's objections to, 293–297; Weldon's defense of, 297–298
Death rates, selective, 283, 288–289, 293, 297; Darwin on, 287; Weldon's investigations of, 298–308, 311–316; Pearson's contribution to, 308–311
de Beer, G. R., 15, 156
De Graaf, Regnier, 43, 197
Delage, Y., 118
Dement, W. C., 324
Descartes, René, 320
De Vries, Hugo, 7, 103, 117, 127, 146, 292; and Mendel, 1; compared with Bateson, 19; and sources of confusion in genetics, 128–131; *Intracellular Pangenesis*, 132, 142–143, 288; on mutations, 137, 148–149; on Darwin's theory of pangenes, 141; contributions of, to genetics, 142–145
Dice, Lee, 154
Diderot, Denis, 272, 275
Dittler, R., 326
Diver, C., 31
Dobzhansky, 152, 153
Doppler, Christian Johann, 139
Du Bois-Reymond, Emil, 322, 326
Duclaux, Emil, 179
Durham, 30
Dzierson, Johann, 139

Earles, M. P., 316
Eiseley, Loren C., 71–72; on Pat-

rick Matthew, 225, 244, 245, 247, 257
Engelhardt, V. A., 319
Euler, Hans, 175
Experimental breeding, William Bateson on, 15–17

Fabricius ab Aquapendente, Hieronymus, 196
Fedorov, V. K., 322, 324–325
Firsov, L. A., 322, 325
Fischer, Emil, 177
Fisher, R. A., 9, 23, 32, 127; his criticisms of Bateson, 3, 10, 11–19, 24, 29; Popperian approach of, 24–25; *Genetical Theory*, 25; work of, on snails and dogs, 30–31; Provine on, 145; and population genetics, 151
Fletcher, Walter, 174
Fokht, A. B., 319
Foster, Michael, 298
Froggatt, P., 9, 10
Funk, K., 320

Gaertner, 15, 133, 135–136, 137
Gaevskaya, N. S., 102
Galen, 326
Galton, Francis, 284, 297–298, 316; on Bateson's *Materials*, 2; his law of ancestral inheritance (heredity), 10, 11, 290–292; *Natural Inheritance*, 20, 21, 29, 289–290; on regression, 20–22, 149, 150; *Hereditary Genius*, 20–22, 287; his theory of heredity, 103, 116; on evolution, 283, 288
Ganin, M. S., 118–120
Gassovskii, L. N., 327
Generation, theories of: Buffon's, 259–260, 263–265, 266, 267–275; Bonnet's, 259–263, 267, 276–279; Buffon's and Bonnet's, compared, 265, 275–276, 279–280
Genetics: Bateson's contributions to, 1, 18; development of Soviet, 97–123 *passim*; literature on, 125–126; opposing schools in, 127–128; problem of clear-cut definitions and concepts in, 128–131; problem of physicochemical explanations in, 131–133; importance of pre-Mendelians to, 133–136; three problems relating to (late 18th-early 19th c.), 136–137; change in conceptualization in, 137–138; origins of theoretical population, 151–154
Geoffroy Saint-Hilaire, Étienne and Isidore, 164
George IV (King of England), 240
Ghiselin, Michael, 245, 249, 255
Gillispie, Charles Coulston, 253, 254
Ginetsinskii, A. G., 319
Gloger, Constantine, 137
Godlewski, Emil, Jr., 179
Goldschmidt, Richard, 146, 148, 154
Grigoryan, N. A., 331
Gureeva, N. M., 330

Haacke, W., 118
Haeckel, Ernst, 110–111
Haldane, J. B. S., 3, 145, 151
Haller, A., 64, 197, 223, 264
Handbook of Physiology (*Rukovodstvo po fiziologii*), 317, 322, 326
Hankins, Thomas, 223
Harden, Arthur, 175, 186
Hartsoeker, N., 47–48
Harvey, William, 196, 264, 318, 320, 321
Heidenhain, R., 328
Helmholtz, Hermann, 320
Herbst, Curt, 177
Heredity: Bateson on role of chromosomes in, 2–3, 18, 27–28; problems of variation and, in Russian biology, 97–123
Hertwig, Oscar, 102, 105, 142, 177
His, Wilhelm, 111
Hofmeister, Franz, 173–174, 176, 186, 188, 192
Holmes, Frederic L., 95
Holmgren, A. F., 326
Hooker, Joseph Dalton, 227–228
Hopkins, Frederick Gowland, 174
Huxley, Julian S., 333
Huxley, Thomas H., 141, 260

Iltis, H., 15
Il'yuchenok, P. Yu., 322
Isaeva, I. I., 325
Ivanitskii, A. M., 322

Janney, Werner, 258
Jenkin, Fleeming, 9, 160, 287–288, 316
Jennings, Herbert S., 150, 151

Jevons, Frank B., 28
Johannsen, Wilhelm, 130, 137, 145, 149, 150
Jordan, David Starr, 149
Jordan, Karl, 148, 149
Joule, James P., 320
Jouvet, M., 324

Keilin, David, 171
Kennedy, John F., 245
Kepler, Johannes, 326
Kholodkovsky, N. A., 113–115, 118, 120, 121–122
Kibyakov, A. V., 319
Kleitman, N., 324
Koelreuter, Josef G., 127, 131–132, 141; Olby on, 133–135, 136-137
Kogan, A. B., 322
Köhler, Wolfgang, 333
Komarov, V. L., 112
Koshtoyants, Kh. S., 319; *Essays on the History of Physiology*, 318
Kostandov, E. A., 323
Kraususkii, V. K., 322, 325
Kravkov, N. P., 334
Kravkov, S. V., 327
Krebs, Hans, 177
Krehl, Ludolf, 177, 187
Kreps, E. M., 319
Krizenecky, H., 3, 15
Kulyabko, E. S., 330
Kvasov, D. G., 331

Lamarck, Jean Baptiste, 104-105, 226; evolutionary theory of, 89–90, 91, 98; Leshaft on, 109–110, 111, 112; *Philosophie zoologique*, 321
Lamarckism and Darwinism, Russian controversy over, 117–118
Lange, K. A., 329–330
Lankester, Ray, 107, 303–304
Lawrence, William, 81, 82, 83–84, 246
Lazarev, P. P., 326–327
Leake, C. D., 326
Leeuwenhoek, A. van, 194, 205, 207; contributions of, to spermatozoan biology, 37–48, 50, 53-57 *passim*, 60–66 *passim*
Lenin, V. I., 321, 322
Lerner, Michael, 152, 153
Leshaft, Petr Franzevitch, 108–113
Lewis, D., 31
Likhachev, A. A., 319
Lillie, Ralph, 180
Linnaeus, 61–62, 73, 129, 195, 205; on hybridization, 134, 137
Loeb, Jacques, 133, 177–183, 184, 189, 191, 192
Lomonosov, M. V., 319, 320–321, 326, 327
London, E. S., 319
Louis Philippe (King of France), 240
Lovejoy, Arthur O., 278
Ludwig, Carl, 133
Lunin, N. I., 320
Lyell, Sir Charles, 69, 73–74, 227, 254; *Principles of Geology*, 72, 75, 76, 85, 89, 91–94; on species, 81, 82, 83; Blyth and Wallace on, 89
Lyon, E. P., 179
Lyubimova, M. N., 319

Macalister, A., 298
Macfadyen, Allen, 186–187
Maiorov, F. P., 325; *Fiziologicheskaya teoriya snovidenii* (A Physiological Theory of Dreams), 324
Maizel', S. O., 327
Makovsky, Alexander, 15
Malthus, Thomas, 26, 94, 160, 163, 245, 249
Marryat, 30
Marx, Karl, 321
Matthew, Patrick: his theory of natural selection, 226–232; his application of natural selection to problems of human society, 232–244; compared with Darwin, 244–258
Maupertuis, Pierre de, 260, 264, 266
Mayr, Ernst, 125–154; 156
Mayzel, 102
Meldola, R., 298
Mendel, Gregor, 1, 10, 34, 125, 137; rediscovery of, 1, 2, 97–98, 145–147; *Principles of Heredity*, 10–12, 19; William Bateson and, 13–19 *passim*; Popperian approach of, 24; influence of laws of, on Russian theories of heredity and variation, 99; Olby on, 126, 127–128, 138–140; and sources of confusion in genetics, 128–129; brilliance of his achievement, 138–140; his most significant contribution, 141–142; and De Vries, 144

Mendelian-biometrician controversy, 9–22, 146–149
Mendelism: William Bateson and, 1–7 *passim;* rise of, 145–147
Menzbier, M. A., 113, 115–117, 120, 121, 122
Menzius, 195
Merkulov, V. L., 327, 329, 330, 331, 333
Meshkov, V. V., 327
Metchnikov, I. I., 102, 104–108, 113
Meyerhof, Otto, 187, 190–191
Miescher, F., 132
Mislavskii, N. A., 319
Mitchurin, 112
Mivart, St.-George, 156, 160–162
Morgan, Thomas H., 1, 2, 130–131, 147, 153; and mutations, 149, 151
Muller, H. J., 2, 153
Müller, Johannes, 322

Naegeli, Karl von, 103, 128, 137; his theory of ideoplasm, 105, 115, 116; his rejection of Mendel, 140; his advocacy of theory of blending inheritance, 140, 141
Natural selection: rejection of, 149–151; Patrick Matthew's theory of, 226–232; Matthew's application of, to problems of human society, 232–244; Matthew's ideas on, compared with Darwin's, 244–258; Darwin's theory of evolution by, 283–289
Naudin, 133, 135
Nebylitsyn, V. D., 322, 325
Needham, John Turberville, 197, 200, 202, 264, 272; his research on problem of generation, 48–50, 54, 57, 62
Nekranov, N. A., 327
Nestorov, M. V., 331
Nevin, N. C., 9, 10
Nilsson-Ehle, 151
Nollet, Jean, 212
Novikov, P. A. 102

Obukh, V. A., 112
O'Conner, Feargus, 241
Olby, R. C., 154; *Origins of Mendelism*, 126, 127–128, 138–140, 141, 145; on the pre-Mendelians, 133–136, 137; on De Vries, 142, 144
Oppenheimer, Carl, 189
Orbeli, L. A., 319, 326, 327, 332, 334
Ostoya, P., 272
Ostroumov, A. A., 319
Ostrovskii, A. N., 327
Overton, Ernest, 180-181, 183, 184, 185, 186
Ovsyannikov, V. F., 319
Owen, Richard, 161

Pangenesis, theories of, 113–114, 141, 142, 260
Parin, V. V., 319
Parnas, Ya. O., 319
Pashutin, V. V., 319
Pavlov, I. P., 322, 323, 334; chronicle of his life and work, 317, 327–330; his work on the nervous system, 319–320; on the typology of behavior, 324–325; correspondence of, 330–333
Pavlov, Vladimir, 330
Pavlov, Vsevolod Ivanovich, 330, 332
Pavlova, Serafima Vasil'evna, 330, 331
Pavlova, Vera Ivanovna, 332
Pearl, Raymond, 151
Pearson, Karl, 20, 148, 292–293, 298, 316; dispute between Bateson and, 2, 3, 10, 19, 23, 24; on regression, 22; his concept of scientific method, 28–29; on natural selection, 149, 150; investigations of selective death rates by, 283, 308–311; and variation, 284; on Galton's law of ancestral heredity, 290, 292; and Weldon, 294; on Weldon's report on selective death rates, 303, 304–305
Pease, Michael S., 3, 31, 32
Peremezhko, 102
Petrushevskii, S. A., 322
Philippov, M. M., 117–118
Popper, K., 3
Popperian versus Baconian scientific method, 23–29
Poulton, Sir Edward B., 1, 148, 149, 298
Prichard, James Cowles, 73–74, 81, 83–84, 86, 93
Provine, W. B., 127, 258; *The Origins of Theoretical Population Genetics*, 126, 145–147, 151–154; on Mendelian-biometrician con-

troversy, 148–149; on natural selection, 150–151
Punnett, R. C., 4, 151; –Bateson poultry notebooks, 29–34
Punnett, Mrs. R. C., 32
Pushkin, A. S., 327

Quatrefages, J. L. A. de, 228

Rabkin, E. B., 327
Raikov, B. E., 101, 102
Razenkov, I. P., 319
Réamur, René de, 209, 212
Redi, Francesco, 43
Regression, 20–22, 148–149, 150
Richardson, H., 10
Roberts, H. F., 16, 127
Roesel, 211
Roger, Jacques, 259, 269–270
Rostand, Jean, 193–194
Rothschuh, K. E., 317
Roux, Wilhelm, 128
Rowland, Sidney, 186
Rozhanskii, N. A., 323
Rubner, Max, 175
Russian Journal of Physiology, 318
Russinov, V. S., 323
Russow, 102

Sachs, Julius, 133, 178
Samoĭlov, A. F., 319, 334
Samsonova, V. G., 326
Sandler, Laurence, 223
Saunders, Edith, 7, 30
Schlegel, Hermann, 80, 83
Schleiden, Matthias, 136, 139
Schmidt, Johannes, 154
Schurig, M., 38–39
Schwann, Theodor, 136
Sechenov, I. M., 319, 334; *Cerebral Reflexes*, 318, 320, 321; *Autobiography*, 318
Sechenov, I. M., Journal of Physiology of the USSR, 318, 333–334
Semper, Karl, 100
Senebier, Jean, 215, 222
Seward, A. C., 27
Shepoval'nikov, A. N., 322, 323, 324
Shimkevitch, V. M., 113, 118, 120–121, 122
Shmalhauzen, I. F., 99
Shmankevitch, V. I., experiments of, 99–101, 102
Shtern, L. S., 319
Simonov, P. V., 322
Slonim, A. D., 322, 323
Sollas, 30
Spallanzani, Lazzaro: contributions of, to spermatozoan biology, 39–45 *passim*, 50, 51, 54–68; his study of spermatic animalcules, 193–223
Spencer, Herbert, 102, 116, 117, 156
Spermatozoan biology: Leeuwenhoek's work on, 37–48; Buffon's work on, 48–55, 63–67; Spallanzani's work on, 54–68, 193–223
Steno, Nicolaus, 194
Stern, Lena, 175
Starkhov, N. N., 104
Strasburger, Eduard, 102, 132
Sturtevant, A. H., 2
Sumner, Francis, 154
Swammerdam, Jan, 196, 211
Swinton, William E., 281

Tarkhanov (Tarchanoff), I. R., 323
Tegetmeier, W. B., 71
Teplov, B. M., 322, 325
Thistleton-Dyer, Sir William, 1–2, 8
Thoday, J. M., 34
Thompson, Herbert, 305
Timiryazev, K. A., 97, 103–104, 113, 117, 118, 122
Tolstoi, L. N., 327
Tonkikh, A. V., 334
Traube, J., 185–186
Tremblay, Abraham, 43, 267
Tschermak, Erich, 1
Tsion (Cyon), I. F., 319, 332

Ukhtomskii, A. A., 320, 323, 334
Unger, Franz, 138

Valmont de Bomare, 195, 206
Val'ter, A. P., 319
Variation, 10, 22; William Bateson on, 7–9, 13, 18–19; problems of heredity and, in Russian biology, 97–123
Verigo, B. F., 319
Verworn, Max, 177–179, 320, 322
Victorius, Paul B., 258
Vinci, Leonardo da, 326
Virchow, 136
Vorontsova, D. S., 334
Vorzimmer, Peter J., 9; his study of Darwin's relationships to his critics, 155–165
Vvedenskii, N. E., 320, 334

Vyrzhikovskii, S. N., 325

Wagner, Moritz, 137
Wallace, Bruce, 152, 153
Wakefield, Edward Gibbon, 243
Wallace, Alfred Russel, 12, 90, 94; "On the Law Which Has Regulated the Introduction of New Species," 69–70, 72, 75–76; compared with Edward Blyth, 72; on species and varieties, 83–84; on Charles Lyell, 89, 94; on theory of natural selection, 95, 149, 160; on Shmankevitch's experiments, 100, 101, 102; and Patrick Matthew, 227
Warburg, Emil, 177
Warburg, Otto: his conception of the *Atmungsferment*, 171–176, 188–192; his membrane theory of respiration, 177–183; work of, on colloids and extracts, 183–188
Weismann, August, 111, 112, 139, 142; his theory of heredity, 101–103, 104; "germ-track" postulated by, 106; Kholodkovsky on heredity theory of, 113–115; Menzbier on heredity theory of, 115–117; Philippov on theory of, 118; Shimkevitch on, 120–121; Russian support for theory of, 121–122; De Vries' criticism of work of, 143–144; on natural selection, 149
Weldon, W. F. R., 8, 288, 292–293; dispute between Bateson and, 2, 3, 9, 19, 23, 24; and Francis Galton, 20, 22; scientific method of, 29; Bateson on, 127; and Mendelian-biometrician controversy, 129, 146–149; on variation versus mutation, 130, 148–149; on natural selection, 149, 150; investigations of selective death rates by, 283, 289, 293, 297, 298–308, 311–316; and variation, 284; and Galton and Pearson, 289–290; intellectual orientation of, 293–294; his defense of Darwinism, 298
Wells, William Charles, 235
Wettstein, R., 154
Wheldale, 30
Wieland, 191
Wilkie, J. S., 272, 316
Wilmot-Horton, Sir Robert, 243
Winsor, Mary P., 281
Wolff, Caspar Freidrich, 265
Wright, Sewall, 127, 145, 151

Yerkes, Robert M., 332, 333
Yerkes, Roberta, 333
Yule, G. U., 10, 145, 149, 150
Yushkevich, A. P., 332

Zeval'd, L. O., 325
Zirkle, Conrad, 127
